DATE MAILED: 10/28/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/490,147	Applicant(s) FREEL ET AL.	
	Examiner Walter D. Griffin	Art Unit 1764	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 August 2003.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3, 8-17, 22-28, 30-32, 37-42, 44-48, 52-59, 63-70 and 74-76 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3, 8-17, 22-28, 30-32, 37-42, 44-48, 52-59, 63-70 and 74-76 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☒ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-3, 8-17, 22-28, 30-32, 37-42, 44-48, 52-59, 63-70, and 74-76 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jessup et al. (5,288,393) in view of Kaneko et al. (5,401,280).

The Jessup reference discloses an unleaded gasoline composition and method of blending the composition. The gasoline composition has a maximum Reid vapor pressure of 7.5 psi, a

50% D-86 distillation point of no greater than 215°F, and a 90% D-86 distillation point of no greater than 315°F. Olefin contents are essentially zero. Jessup specifically discloses that the gasoline requires no methyl tertiary butyl ether to be present in the composition. This discloses the limitation that the gasoline is substantially free of oxygenates. The paraffin content of the gasoline is preferably greater than 85 vol%. This teaching of paraffin content would necessarily require aromatic content to be less than 15 vol%. However, Jessup also discloses that hydrocarbon emissions are reduced when the aromatics content is increased. See entire document, especially column 1, line 27 through column 7, line 58, column 14, lines 3-68, column 15, lines 20-46, and column 17, line 57 through column 18, line 4.

Jessup does not disclose the claimed sulfur content of the gasoline and does not disclose an aromatics content of between 25 and 30 vol%.

The Kaneko reference discloses a gasoline composition in which the sulfur content of the gasoline is preferably below 20 ppmw. See col. 3, lines 16-21.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the gasoline composition of Jessup by limiting the sulfur concentration to values within the range disclosed by Kaneko because a gasoline with this amount of sulfur would not harm the exhaust gas cleaner.

It also would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the gasoline of Jessup by having the aromatics content be between 25 and 30 vol% because increasing aromatics content over that which is explicitly disclosed to values within the claimed range would result in the expectation that hydrocarbon emissions would be reduced.

Providing these modifications to the gasoline of Jessup would necessarily result in a gasoline that fails the predictive model requirements for emissions.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3, 8-17, 22-28, 30-32, 37-42, 44-48, 52-59, 63-70, and 74-76 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14, 17-32, and 35-45 of copending Application No. 10/210089.

Although the conflicting claims are not identical, they are not patentably distinct from each other because each set of claims is drawn to a method of blending a gasoline and the gasoline composition. The claims differ by certain ranges for characteristics of the gasoline. However, the gasoline in the present claims and in the claims in 10/210089 have overlapping characteristic values.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 1764

Claims 1-3, 8-17, 22-28, 30-32, 37-42, 44-48, 52-59, 63-70, and 74-76 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14, 17-32, and 35-45 of copending Application No. 10/210090. Although the conflicting claims are not identical, they are not patentably distinct from each other because each set of claims is drawn to a method of blending a gasoline and the gasoline composition. The claims differ by certain ranges for characteristics of the gasoline. However, the gasoline in the present claims and in the claims in 10/210090 have overlapping characteristic values.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-3, 8-17, 22-28, 30-32, 37-42, 44-48, 52-59, 63-70, and 74-76 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14, 18-32, and 36-44 of copending Application No. 10/120497. Although the conflicting claims are not identical, they are not patentably distinct from each other because each set of claims is drawn to a method of blending a gasoline and the gasoline composition. The claims differ by certain ranges for characteristics of the gasoline. However, the gasoline in the present claims and in the claims in 10/120497 have overlapping characteristic values.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-3, 8-17, 22-28, 30-32, 37-42, 44-48, 52-59, 63-70, and 74-76 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being

Art Unit: 1764

unpatentable over claims 1-14, 18-32, and 36-44 of copending Application No. 10/120498.

Although the conflicting claims are not identical, they are not patentably distinct from each other because each set of claims is drawn to a method of blending a gasoline and the gasoline composition. The claims differ by certain ranges for characteristics of the gasoline. However, the gasoline in the present claims and in the claims in 10/120498 have overlapping characteristic values.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-3, 8-17, 22-28, 30-32, 37-42, 44-48, 52-59, 63-70, and 74-76 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14, 17-33, and 36-49 of copending Application No. 09/603899. Although the conflicting claims are not identical, they are not patentably distinct from each other because each set of claims is drawn to a gasoline composition. The claims differ by certain ranges for characteristics of the gasoline. However, the gasolines in the present claims and in the claims in 09/603899 have overlapping characteristic values.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-3, 8-17, 22-28, 30-32, 37-42, 44-48, 52-59, 63-70, and 74-76 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19, 23-35, and 39-51 of copending Application No. 09/603585. Although the conflicting claims are not identical, they are not patentably distinct from each other because each set of claims is drawn to a method of blending a gasoline and the gasoline

composition. The claims differ by certain ranges for characteristics of the gasoline. However, the gasolines in the present claims and in the claims in 09/603585 have overlapping characteristic values.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-3, 8-17, 22-28, 30-32, 37-42, 44-48, 52-59, 63-70, and 74-76 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 26-46 of copending Application No. 10/367998. Although the conflicting claims are not identical, they are not patentably distinct from each other because each set of claims is drawn to a gasoline composition. The claims differ by certain ranges for characteristics of the gasoline. However, the gasolines in the present claims and in the claims in 10/367998 have overlapping characteristic values.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1-3, 8-17, 22-28, 30-32, 37-42, 44-48, 52-59, 63-70, and 74-76 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-25 of U.S. Patent No. 6,132,479. Although the conflicting claims are not identical, they are not patentably distinct from each other because each set of claims is drawn to a method of blending a gasoline and the gasoline composition. The claims differ by certain ranges for characteristics of the gasoline. However, the gasolines in the present claims and in the claims in the patent have overlapping characteristic values.

Art Unit: 1764

Claims 1-3, 8-17, 22-28, 30-32, 37-42, 44-48, 52-59, 63-70, and 74-76 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-107 of U.S. Patent No. 6,383,236. Although the conflicting claims are not identical, they are not patentably distinct from each other because each set of claims is drawn to a method of blending a gasoline and the gasoline composition. The claims differ by certain ranges for characteristics of the gasoline. However, the gasolines in the present claims and in the claims in the patent have overlapping characteristic values.

Response to Arguments

The argument that the Jessup reference in no manner discloses or suggests the ability of a substantially oxygenate free gasoline to exhibit low emission and still offer flexibility while not meeting the requirements of the California Predictive Model is not persuasive because the rejection is based on a combination of references.

The argument that the Kaneko reference teaches away from the claimed invention in that Kaneko requires the presence of an oxygenate is not persuasive. The disclosure in the Kaneko reference that the sulfur contents are preferably below 20 ppm in order to prevent malfunction of the exhaust gas cleaner would apply regardless of the presence of oxygenates in the gasoline.

The argument that the Kaneko reference does not suggest lowering sulfur to amounts of 10 ppm or less is not persuasive. Kaneko explicitly discloses that sulfur levels are more preferably below 20 ppm. In other words, Kaneko discloses to one having ordinary skill in the art that sulfur levels should more preferably be between 0 and 20 ppm. Therefore, the examiner asserts that this disclosure would necessarily suggest sulfur amounts of below 10 ppm.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Walter D. Griffin whose telephone number is 703-305-3774. The examiner can normally be reached on Monday-Friday 6:30 to 4:00 with alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on 703-308-6824. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Application/Control Number: 09/490,147
